SENIOR SOFTWARE ENGINEER
FULL STACK / PHP & PYTHON

We're looking for experienced software engineers who are passionate about digitally transforming Sri Lanka.

SKILLS:
- Demonstrated ability to lead a team of engineers and successfully meet project deadlines.
- Highly proficient in Cake PHP, Laravel, Javascript, CSS & HTML. Knowledge of Python is an advantage.
- Able to build REST APIs in PHP.
- Experience in profiling and troubleshooting PHP applications.
- Experience in data visualization tools like Grafana & Superset. MySQL workbench and VS Code is an advantage.
- Familiar with MySQL and PostgreSQL.
- Able and willing to learn new programming frameworks.
- Creative and quick problem-solver; strong research, analysis & project management skills.
- Strong communication, presentation & training skills.
- Takes initiative and works with minimal supervision.
- An expert in Github & opensource best practices; contributions to open source projects is an advantage .

QUALIFICATIONS
- 2-3 years work experience (excluding internships)
- Reading for a Bachelors in Computer Science, Electrical Engineering, or a related field or experience in the above.

ABOUT LANKA SOFTWARE FOUNDATION
Lanka Software Foundation, chaired by Dr. Sanjiva Weerawarana (founder of WSO2) was established in 2003 with the vision of positioning Sri Lanka as a global Free and Open Source (FOSS) research & development hub. LSF partners with public and private organizations across sectors - from education and elections to transport and the environment, to build technology that creates impact and solves local as well as globally relevant challenges.
